Video Analytics

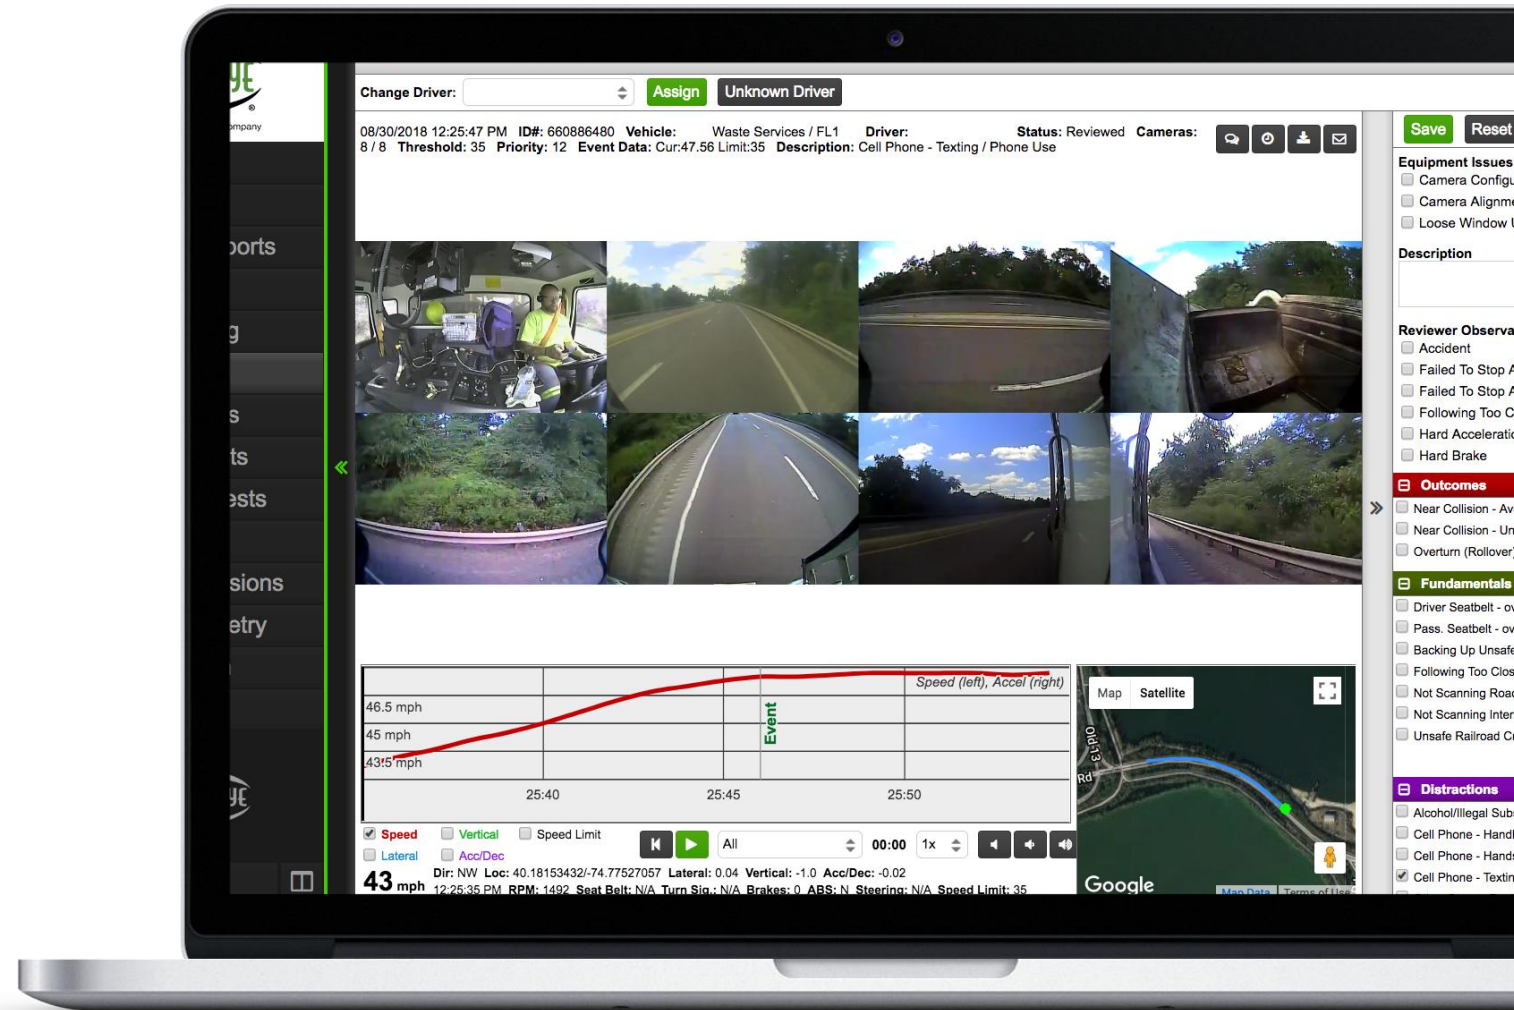

## Hardware Features & Design

- Up to 256GB MicroSD card  
- Approximately 300 hours)
- Up to 8 cameras recording
- Real time video analytics and driver event processing
- Linux Operating System
- Open architect for future expansion

# Protecting your people

- ✓ Up to 6 additional cameras
- ✓ Never miss an accident
- ✓ Reliable Managed Service
- ✓ 25 frames/sec video clips
- ✓ Advanced video analytics

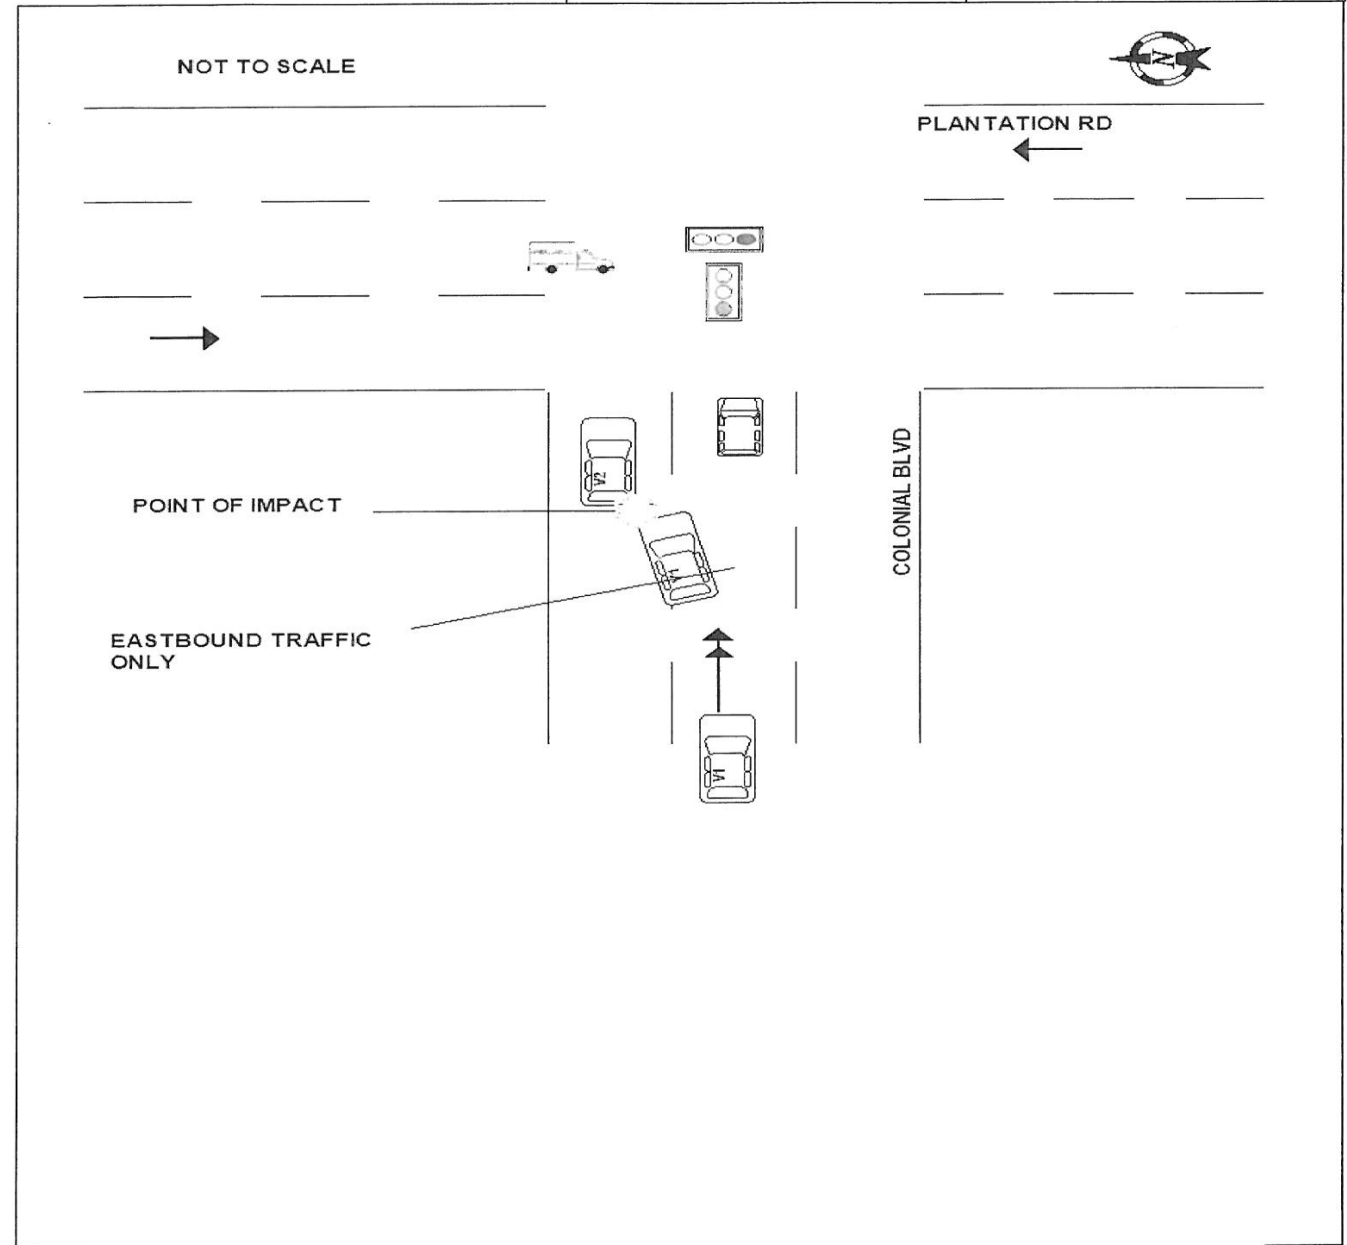

# Protecting your people

# Protecting your people

- Original police report had the roll off truck traveling in center lane.
- Reported stated that the roll off truck changed lanes and created the impact.
- Originally described as a rear end collision, ALL liability was placed on the roll off driver.
- After providing the police with the video from the truck, 100% of the responsibility was transferred from the roll off truck to the utility truck.
- In this case, a picture was worth a couple hundred thousand words.

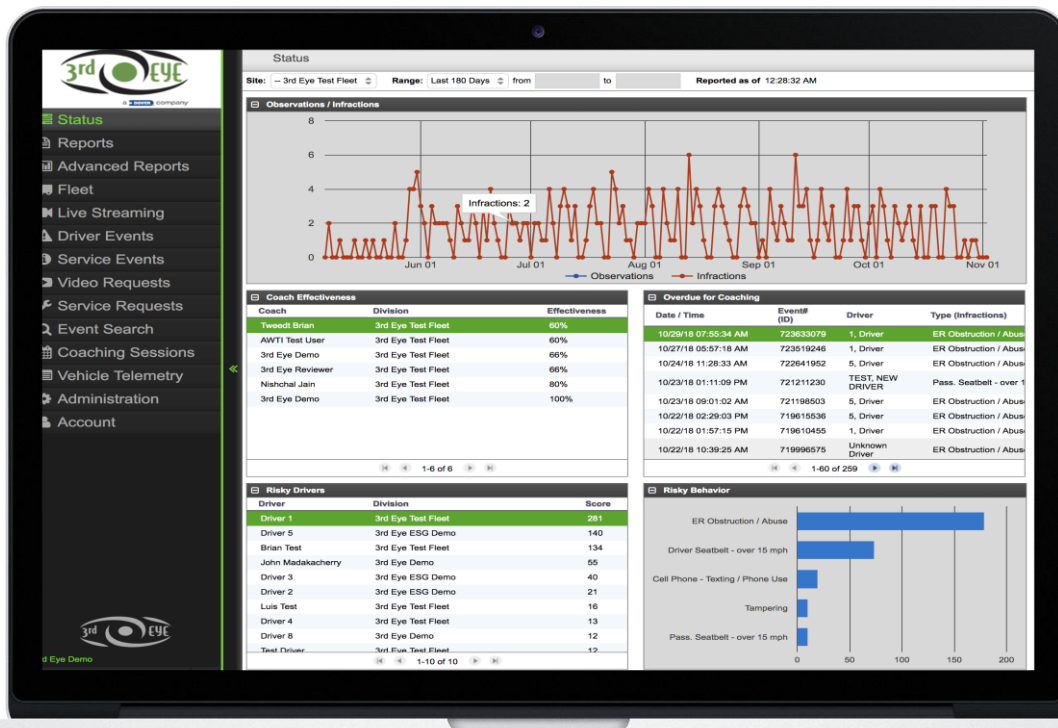

# 3rd Eye 5 Step Safety Cycle

Easy to use customized web portal for data management and coaching

1

Event Recorder

2

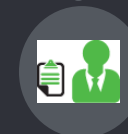

Real Time Upload as Events Occur

3

Data evaluated for safety, operations and maintenance

4

Simplified Web Based Coaching

5

Automated KPI Reporting

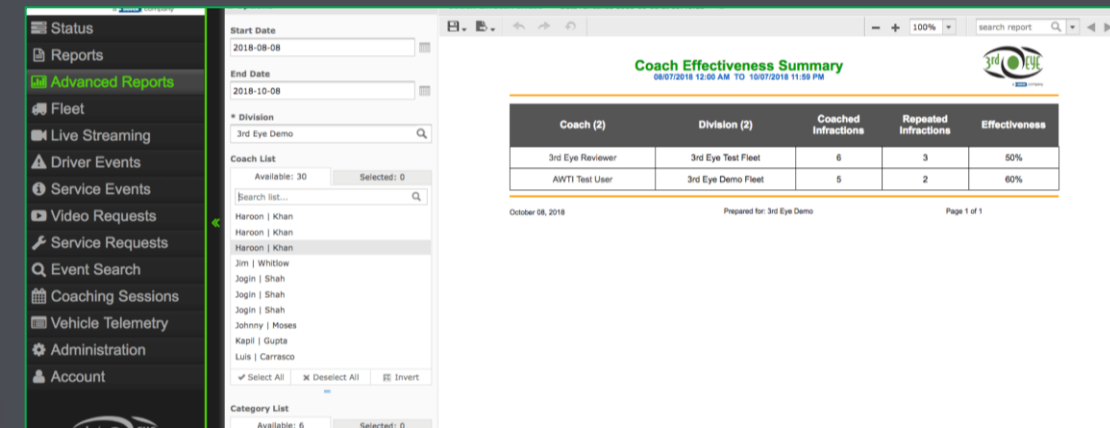

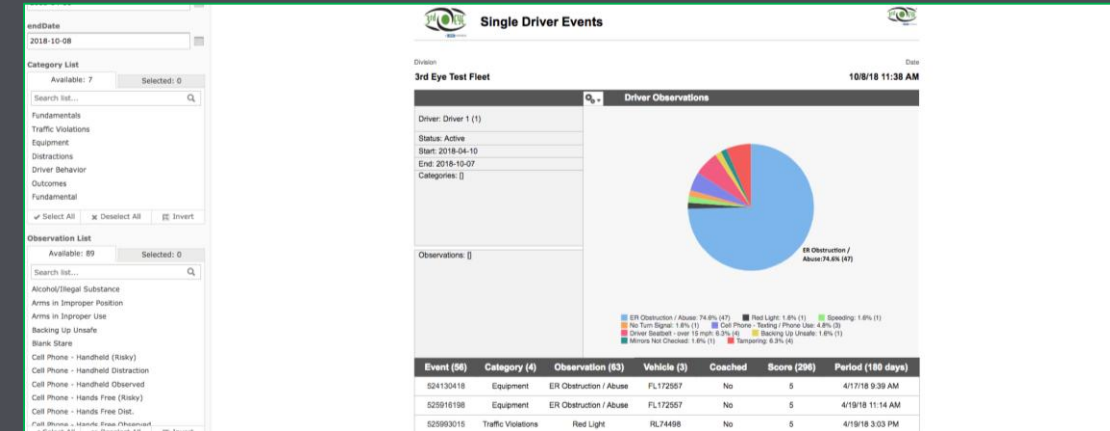

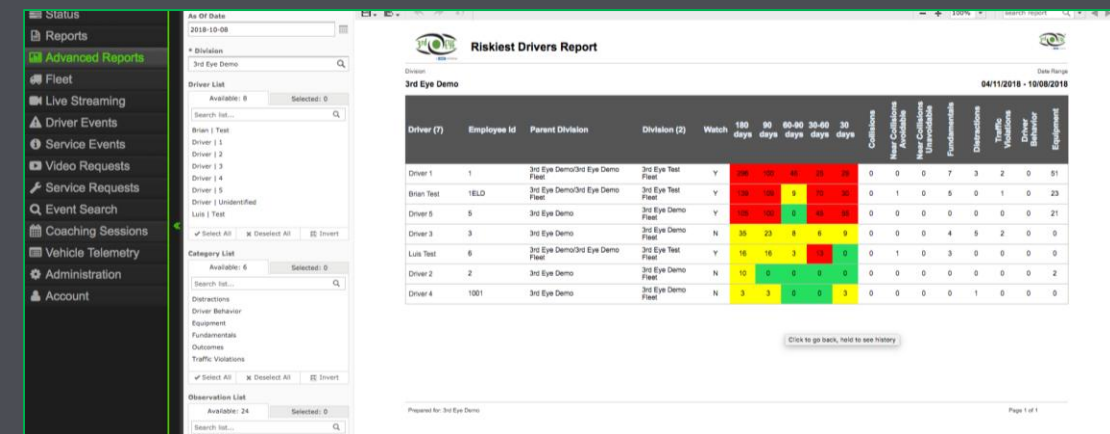

3rd Eye Digital Solutions

# Advanced Safety Reporting

- ✓ Custom Real Time Reporting
- ✓ Monitor Both Drivers and Coaches

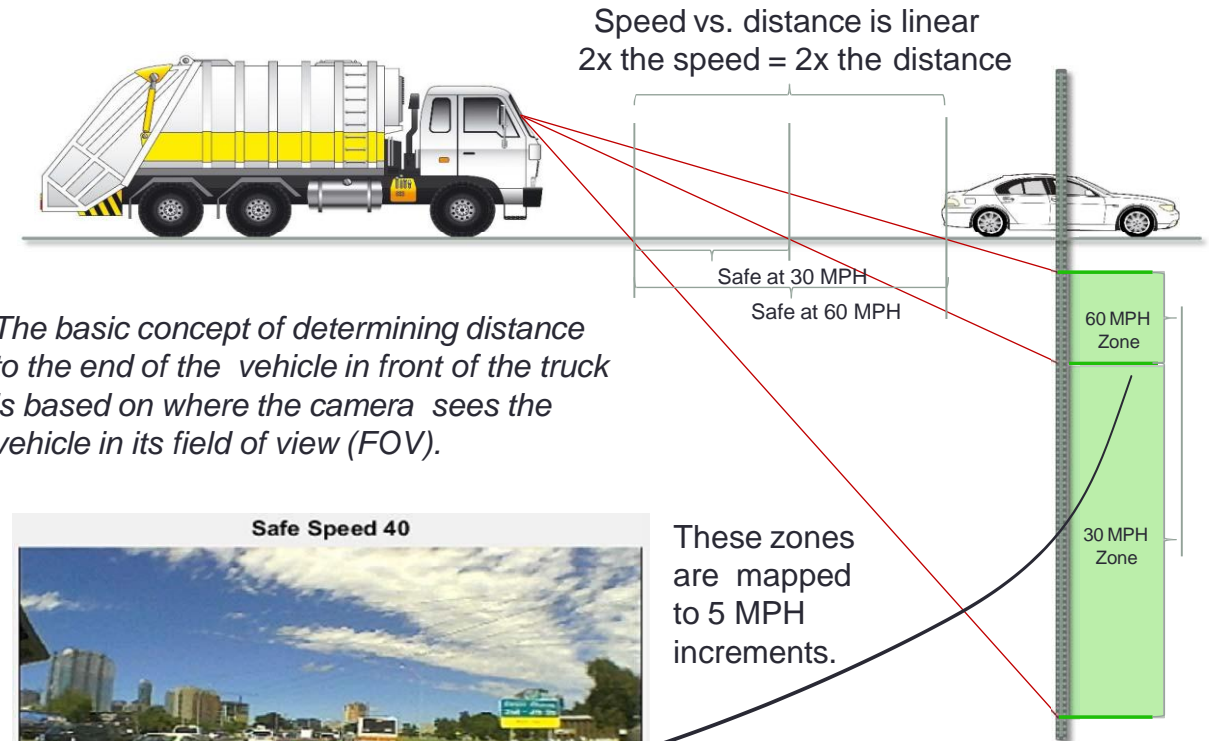

www.3rdeyecam.com

# Advanced Video Analytics

*The basic concept of determining distance to the end of the vehicle in front of the truck is based on where the camera sees the vehicle in its field of view (FOV).*

These zones are mapped to 5 MPH increments.

The safe speed, based on the 3 second rule, is based on where the back of the vehicle is located in the zone mapping

# Using Technology To Positively Impact Your Fleet

**Operations**

**Maintenance**

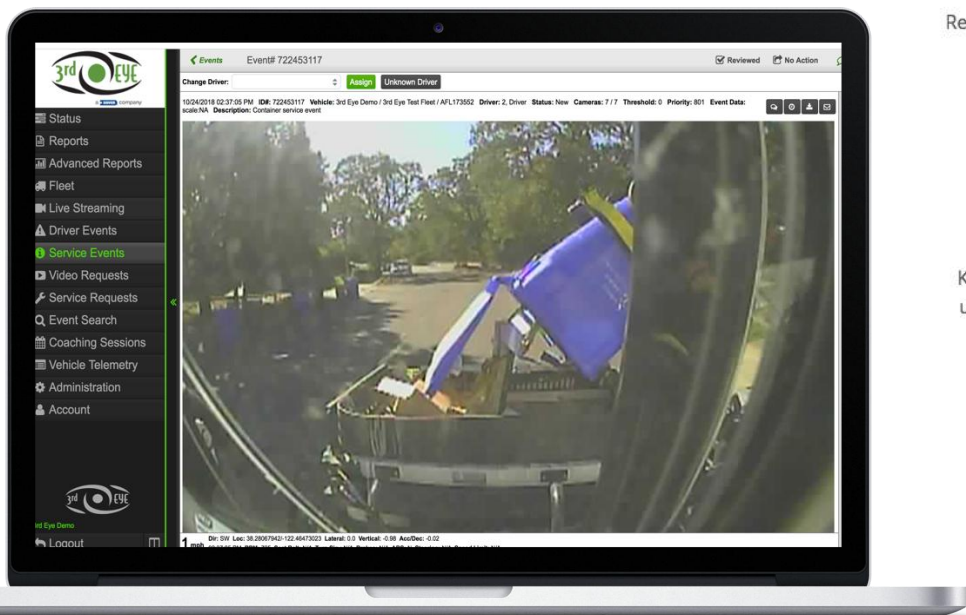

**Fuel Tax / Usage  
Administration**

# Enhanced Awareness

- ✓ Custom KPI Metrics
- ✓ Site Conditions
- ✓ Evaluate Productivity
- ✓ Identify Opportunities

## SAFETY

Wrap assets in 360° of camera coverage to monitor vehicle and driver environment in real time

## ASSET UTILIZATION

Record and track the hours your assets are working and their exact location

## ENGINE DIAGNOSTICS

Know the health of your engine with key utilization metrics captured in real time.

## EQUIPMENT BEHAVIOR

Know the complete status of your garbage truck's hopper, compactor, and ancillary equipment in real time.

## ON ROAD/OFF ROAD

Know when your assets are on highway and when they're not with the data to validate

## CUSTOM SOLUTIONS

Refuse fleet solutions customized for your business needs.
